Testing navigation flow/design

Tasks:

- Navigate to the projects
- View a project
- Full screen a learning outcome image
- Navigate back to home
- Contact me

Feedback

- Timo: Nothing to say, good structured.
- Milan: Menu icon could be confusing for older people.
- Rick: If I want to see your work fast, then there should something on the top to navigate to your projects quickly.
- Rik: Everything is good accessible.
- Jordi: Everything was very clear and I really liked the design of having random projects in the homepage, to see your highlighted projects there.

[w] = Work completed

[x] = Failed

Task	Timo	Milan	Rick	Rik	Jordi
Navigate to the projects	[w]	[w]	[w]	[w]	[w]
View a project	[w]	[w]	[w]	[w]	[w]
Full screen a learning outcome image	[w]	[w]	[w]	[w]	[w]
Navigate back to home	[w]	[w]	[w]	[w]	[w]
Contact me	[w]	[w]	[w]	[w]	[w]

Analyzing feedback

Testing the flow went very smoothly, since everyone passed there task really fast and finished it. The feedback that they given we was mostly that on the homepage they want to go faster to all my projects and the menu icon was a bit confusing.
